The Department of Veterans Affairs estimates that there are currently more than 21 million US Military Veterans in the United States.

Although the VA has created assistance programs for veterans who want to start and operate businesses, many have not made their way through the myriad of documents to 1) create their own business 2) promote their own business and 3) sell their products and services to the commercial and government markets.

A government contracting officer may award to a service-disabled veteran-owned company a SOLE SOURCE contract not to exceed **\$5 million** for manufacturing requirements and up to **\$3 million** for all other requirements.

Why is this program important?

- Veterans are returning home without jobs.
- The federal government has set-aside goals for veteran-owned companies.
- Many organizations have committed to hiring veterans.
- SELLTGOVERNMENT.COM is committed to helping returning veterans become the corporations doing the hiring!
- SELLTGOVERNMENT.COM has expertise in securing government contracts.
- SELLTGOVERNMENT.COM is offering a flexible program to help these veterans get started in business.
